

Introducing...

EZ-sensor[™]

Programmable Tire Pressure Monitoring Sensor

- Eliminate lost sales
- Optimize inventory levels
- Reduce risk of installing the wrong part
- Increase speed, ensure accuracy, and reduce cost of servicing TPMS equipped vehicles
- Program a duplicate set of wheels and tires to match the OE vehicle
- Works with the Schrader[®] and Bartec[®] OBD learn tools you already own

(Part No. 33000)

(Part No. 34000)

...Always Have the Right Part, Right Away

EZ-sensor advantages:

- Schrader patented technology offers a truly programmable solution with snap-in & clamp-in options
- EZ-sensor performs identically to the original OEM-equivalent
- The EZ-sensor comes blank and is fully programmable to the selected vehicle type
- EZ-sensor (315 MHz) coverage includes specific vehicles on leading platforms such as Ford[®], Lincoln[®], Mercury[®], GM[®], Chrysler[®], Chevrolet[®], Dodge[®], Jeep[®], Toyota[®], Lexus[®], Scion[®], Honda[®], Mazda[®], Nissan[®] and Infiniti[®] (see EZ-sensor application guide)
- In late 2011, a second sensor (433 MHz) will be introduced
- Two EZ-to-program snap-in sensors will eventually replace over 90% of OEM SKUs
- Parts available include EZ-sensor (Part No. 33000); Snap-In Service Pack (Part No. 20008); Aluminum Clamp-In Stem Pack (Part No. 34000); Clamp-in Stem Service Pack (Part No. 20014)

Order EZ-sensor today. Software updates are now available.
